## MANZANO SHALLOW 1 & 2 FLOW AT COMBINED 2.5 MMCFD

### **Manzano Shallow (St TRACT 991 #1) BNP Turnkey Operator, GGP WI Prospect 35%**

The Board is pleased to announce that the Manzano Shallow well has successfully recommenced production.

The well is presently on production with an initial production rate of 1 million cubic feet per day of gas from two 4 foot intervals perforated in the Marg Frio formation. The Manzano well had originally tested a deeper Marg Tex interval. Further examination of the deeper interval determined that it would not be productive beyond its very short initial production.

### **Manzano Shallow Development well – (Dunn McCampbell 11A) BNP Operator, GGP WI Prospect 35%**

The Second Manzano Well (Dunn McCampbell 11A) was spudded on 5 April 2008 (Texas, USA).

The Board is pleased to announce that the Dunn McCampbell well has successfully flowed gas and has been brought into immediate commercial production.

The well has been tied directly into the sales grid along with GGP's other producing wells and has been producing at a rate of 1.5 million cubic feet per day of gas from a perforated 8 ft interval over an extended production testing period.

Partners in the ST991#1 & Dunn McCampbell 11A wells are:

Golden Gate Petroleum Ltd (ASX: GGP)	35.00% WI
Modena Resources Limited (ASX: MDA)	15.00% WI
BNP et al	50.00% WI

#### **Comments**

**The Company continues to be pleased with the exploration success achieved in the past 12 months. With the addition of DM#11A the Company is generating strong production at a time when US gas prices are at prices over US\$12 mcf.**
